Project Overview

Our project, EventSync, is a platform that helps the organizers and people who love attending events connect with each other. This platform allows the organizers to add their events in order to attract more crowds to the events and for people to discover all types of events happening around them according to their liking.

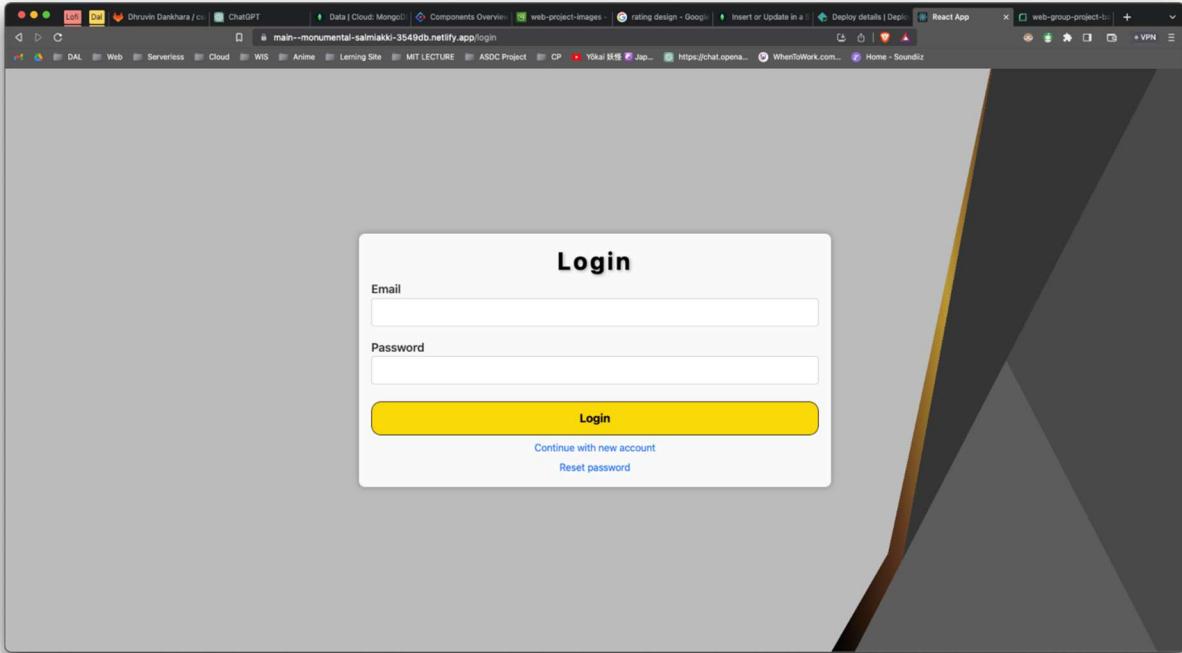

Our platform will collect the preferences and interests of the user during the time of registration in order to provide suggestions. Through our platform, users will be able to browse through different types of events that are happening around them by searching through the events based on several criteria like location, date, event type and more. Users will also be able to add events to their wishlist that they find interesting and would like to save for quick access. The platform will also allow users to provide ratings and reviews of the events that they attended, providing valuable feedback for both event organizers and potential attendees. Additionally, the users will also receive reminders and notifications for their enrolled events. As a way to develop trust from users regarding the authenticity of events, event organizers will get approved by the admin before adding events on our platform. Our platform also provides several kinds of analytics of events for the event organizer which could help them in their business.

EventSync is an essential service as it provides an easy and convenient way for users to discover events happening around them as well as help the event organizers to reach a larger crowd. Our platform will simplify and customize the event discovery process for users, making it more user-friendly and elevating the overall user experience.

Halifax wanderers

Date & Time: Tue, 08 Aug 2023 22:34:54 GMT
Location: Halifax
Category: Sport

Description: A footwall event refers to an earthquake that occurs due to movement along the fault plane's lower side, known as the footwall. It is a geological event that results from tectonic forces causing one block of the Earth's crust to move upward relative to the other. These events can lead to significant seismic activity and ground displacement, potentially causing damage to structures and affecting the surrounding environment.

Holi festival

Date & Time: Thu, 31 Aug 2023 03:10:00 GMT
Location: Dartmouth
Category: Fun

Description: Holi is a Hindu festival celebrated in India and Nepal, known as the "Festival of Colors." It marks the arrival of spring and symbolizes the triumph of good over evil. People joyfully play with colored powders and water, breaking barriers and fostering unity. Holi promotes love, happiness, and cultural diversity, transcending social boundaries. It's a vibrant and inclusive celebration enjoyed globally.

My Event List Page (completed events)

The screenshot shows a web application titled "Approval Requests". The interface includes a header with "Pending Queries" and "Logout" links. Below the header is a section titled "Approval Requests" containing a table with three rows. Each row represents a user email and includes a "Download Certificate" button and "Approve" and "Decline" buttons.

User Email	Certificate	Actions
maulvifaizal@gmail.com	Download Certificate	Approve Decline
maulvifaizal@gmail.com	Download Certificate	Approve Decline
gokufromdbz01@gmail.com	Download Certificate	Approve Decline

Admin Approval Page

The screenshot shows a web application titled "Queries". The interface includes a header with "Pending Approval Requests" and "Logout" links. Below the header is a section titled "Queries" containing a table with four rows. Each row represents a user query and includes a "Reply" button.

User Name	Title	Description	Actions
Faizal Maulvi	Testing testing testing Testing the title length for width	Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s when an unknown printer took a galley of type and scrambled it to make a type specimen book.	Reply
Vatsal Jain	Title 1	Description 1	Reply
Vatsal Jain	Title 2	Description 2	Reply
Vatsal Jain	Title 4	Description 4	Reply

Admin Query Page (for Admin)

The screenshot shows a web application interface titled "React App" with a URL "main--monumental-salmiakki-3549db.netlify.app/admin/queries". The main area displays a table titled "Queries" with columns: "User Name", "Title", "Description", and "Actions". There are four rows in the table:

User Name	Title	Description	Actions
Faizal Maulvi	Testing testing testing Testing the title length for width	... Reply to a Query	<button>Reply</button>
Vatsal Jain	Title 1	Query Title: Testing testing testing Testing the title length for width	<button>Reply</button>
Vatsal Jain	Title 2	Description: Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s when an unknown printer took a galley of type and scrambled it to make a type specimen book.	<button>Reply</button>
Vatsal Jain	Title 4	Description: Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s when an unknown printer took a galley of type and scrambled it to make a type specimen book.	<button>Reply</button>

A modal window titled "Reply to a Query" is open, containing fields for "Query Title" and "Description", and a text input area with placeholder "Enter your text here...". At the bottom are "Cancel" and "Send Reply" buttons.

Response to Admin Query

The screenshot shows a Gmail inbox with one unread email. The email is from "eventsyncdal@gmail.com" and is titled "Approval request approved". The subject line indicates "Your approval status for posting events has been approved". The email body contains a single sentence. At the bottom of the email are "Reply" and "Forward" buttons.
